

# Identa

.....

Traditional treatment of oral disease is extremely costly, the fourth most expensive disease to treat in most industrialized countries. Furthermore, several recent clinical studies suggest oral disease and inflammation (oral bacteria & oral infections) may be a risk factor for serious systemic diseases.

Identa is revolutionizing oral hygiene. Using antibacterial light treatment, We add a new concept to conventional brushing and flossing. Identa antibacterial treatment is highly effective against Str. Mutans, without antimicrobial resistance. It's easy, it's safe and it's proven.

## SPARK VALUE

We are looking for research partners, business developers and marketing experts

### Tommi Pätilä MD

Tommi has an outstanding scientific and medical career. He has first hand knowledge of systemic effects of mouth diseases which was the early motivator when Identa-project was started.
